Carol at Press Club - 2001

Carol Rosin was a key DisclosureProject witness. She worked with the ex-Nazi rocket scientist Wernher von Braun in the years before his death. In this time he repeatedly informed her that a long term plan was in place which would culminate in space weaponisation.

This scenario ended a long series of created and manipulated 'enemy' scenarios with the idea of the alien threat being the last one.

Also this quick passage goes inot a few issues thrown up by this area... this is a forum excerpt:

Is this part of the plan to gently introduce the extra-terrestrial reality to the global public?

Well the point is we don't know.

It is likely that as Wernher von Braun proposed [new video added] and Steven Greer has discussed many times - it's no clear cut situation but the potential exists given we have a highly sophisticated media/PR system run by various branches of both US and UK governments.

So... the use of the ET meme/reality will be the ultimate staged geopolitical event. But in my book this one will ONLY be pulled out of the bag when:

a: The above government faction[s] are really, really desperate

b: When the public have sufficient knowledge [conditioning?] to make it a feasible option with tangible results [ie: martial law clamp-down?].

This is not about validating the ETI reality - this bit is done and dusted. What it is about is researchers finding out to what extent any alien groups are working for "non-ethical" exopolitical agendas with global black project/govt. structures.

There are ways of finding out that if UFOs/ETVs/ARVs arrive above your head you can work on whether these are the clunky replica vehicles of the military or indeed highly advanced craft from other worlds and dimensions. BUT without knowledge and awareness from raised consciousness - this is nigh-on impossible.

Jim Sparks is one such person who has seen first hand the liaison between cutting edge military/science groups and 3 types of ET.

Jim's interviews and data: <http://tinyurl.com/6d26jq>

We have booked Jim to talk on this and his ideas on releasing currently sequestered energy tech other issues in August in the UK Midlands.
