AI Based Web SPYders: UPDATE - October, 2008 :: Updated with new interviews November 2008

- Additional notes and comments by david@exopolitics.org.uk

Just as we have individual 'intuitions' and the planet has a localised 'intelligence' in the form of the Gaian Overmind, it seems highly feasible that the species has a collective pre-cognition ability which can now be measured via the one form of collective expression we use in the 21st century: networked technology.

On Sept 21, 2008 on Coast to Coast, George Ure and colleague 'Cliff', AKA the time monks - shared predictions based on their web bot technology. Their method captures shifts in language patterns by crawling vast amounts of internet sites and forums. The aggregated data is then semantically weighted and analysed with via Cliff's software to determine various themes and appropriate meta-linguistic frameworks which provide keywords and "build up" and "release" language to predict future trends and patterns.

Read on for more and 3 hrs of audio...

Apologies for the lack of Exopolitics UK newsletter this summer - so much going on that it's been hard to pin down and prioritise a news release.

Exopolitics covers far more than the ET issue as we attempt to describe on the front page of the site. With this in mind I'd encourage anyone who has yet to listen to one of the interview sessions with the Half Past Human duo to put aside a few hours and read/listen below.

You can spot the futurists and social/cultural analysts who have their head screwed on because they "get" the fact that the issue of advanced beings has to be and of course is part of any current or future valid vision. There are too many self-proclaimed experts and prophets these days who talk incessantly without including exopolitics in any shape or form - their data will be seen as wholly useless when we look back in a few years time. Note the elements related to ETs and "disappearance" which are discussed by the Web Bot authors.

Things are getting NOVEL - perhaps this is the temporal backwash from that infamous [and now slightly annoying] 2012 epoch??!

Buy n0w!

davID, Exo UK

Update: Fractal timewave reveals sharp descent into novelty between October 7th and December 7th 2009.

See end of article.

Update: New October and November interviews updating and commenting on previous prediction outcomes... scroll down.

The Web Bots (www.halfpasthuman.com)
- are independently forecasting Impending Event Alerts - the impending Event Alert period is from Oct 2008 through March 2009.

WEB BOT PREDICTIONS FOR THE COMING WEEKS/MONTHS/YEARS:
Coast to coast Radio with "Time Monks"

Web Bot Report Foresees October 7 "Turning Point" :: Time Monks answered questions on C2C radio during the early morning hours on September 22nd, 2008.

Short recap to the previous Web Bot interview from September 2nd, 2008:

" The Web Bots see September 22-27, 2008 as precursor dates to the main turning point date of October 7, 2008. Closely watch events during September 22-27, 2008 for hints as to what to expect on

October 7, 2008. "

Cliff remarked that the patterns they are seeing for the October 08 - February 09 period have similarities to what they observed in the run up to and after 9/11.

The Web Bots foresee that October 7, 2008 to February 19, 2009 will be filled with emotional intensity, and the length of the release period will be extraordinary. The Web Bots have never picked up any event lasting this long. In comparison, 9/11 length lasted about 10 days. This event will be four months of high emotion.

Outline for 2008/2009 ::

The next year will get very ugly and will change your life worse than 9/11. It is important to understand the magnitude of the data. The sort of agony, grief, pain and rage that was felt the six days following 9/11 will be felt for five and a half months. From October 7th, 2008 until March of next year.

* Will there be a total economic collapse?

Yes. 2009 will be a "year of transformation." The keyword "monumental" shows up as how the future will view our current situation. Time Monks describe this as an "epic situation"

* How to prepare for what's coming?

Have a plan in place to be as independent of the institutions of society as you can possibly get. Prepare for a situation in which you will have no water, food, electricity or heat. Have clothing for all seasons and EXTRA MEDICINE. Possibility of oil going up to \$500 a barrel, also possible massive deflation from nobody buying anything. This is the kind of thing where the other nations on the planet will be so scared of what's going to happen in the U.S. that they will begin preparing, fearing that the U.S. will go crazy. This includes mobilizing military.

Try not to panic, we have a couple of weeks. You cannot store enough to get you by indefinitely. A

situation may arise in which you may need to be relocated. Time Monks do not advocate bank runs because money may become useless. Says longer term data "implies money is less intense part of society than it is now."

* September 22nd - 27th - The Plateau of building tension.

On October 6th, 11:59 pm, the planet is going to go through a period of "release" following the traumatic event. The information will spread very quickly due to technology. The release language will start at the point of impact.

2

The event could be something such as a "false flag terror attack" in some part of the world, U.S. may not necessarily be at the epi-center of said event. It could also be a "slow boil" event such as a bio-agent released. There are expected elements of a prequel that will set the stage for the event, between the dates of September 15th-September 27th.

* Is this a self fulfilling prophecy?

Time Monks say this is possible.

* Is there something worse looming?

"The situation is complex, not a single trigger. 45-58% economic, 40% military, the rest is terra activity."

Really big numbers popped up that are quite worrying. Somewhere between 2 to 22 million lives will be drastically affected by the event. It is possible that a manufactured terror event will lead to terrible things. Possibility of martial law or military reaction to terror event, real or manufactured.

It's important to grasp that there isn't one single event predicted to occur in the period they have outlined. Instead it seems likely that the foundations or trigger-points will be created along the way and possibly build to a series of crescendo points.

* Is this inevitable?

Time Monks do not know. Cite the possibility that if enough people get the message it may be possible to hijack the future based upon knowing about "constant co-creation".

* December 10th-12th, 2008 - China sized earthquake in Pacific NW.

* In 2009 there will be a global coastal event.

This does not necessarily mean a tsunami. If you live around water it would be good to have a boat.

* Are there other think tanks who are saying something similar not based on the same system?

"We know the Chinese are into this.": Similar language grabbing

program with much larger chunks. Time Monks tracked these techniques back to a Chinese super computing center.

* Are U.S. agencies using Web bots?

They have used remote viewing in the past, but it's not as accurate as what we're doing. The current thinking in the military and alphabet organizations is that they want massive databases. They are looking for social networking. They think in terms of if they can find one terrorist they can find the rest of network. The web bot is not based on this style of gathering information. Web bot looks for big stuff. It's like comparing binoculars to a microscope. Web bot looks for MASSIVE Change. Web bot is not a "microscope" like military program. Also, these groups (military and alphabet organizations) may not need web bot if they're creating what is going to happen. The Time Monks contacted the Pentagon to take a look at what they have found and submitted a brief. CIA said it's interesting but they're not interested.³

* Anything about Antarctica/Global Warming?

Antarctica is very important to the "powers that be". 13% of linguistics related to the "powers that be" concern Antarctica. Antarctica is big key to whatever is driving them.

* Anything to do with the Hadron Collider?

Time Monks not worried about Hadron Collider. Data so far indicates that the scientists at CERN are performing a "juggling act and keep dropping oranges". Doesn't show up in linguistics as a driver in what's about to occur.

* Do you believe extraterrestrials are real and/or play a role?

Within consciousness, there is a distinct consciousness that is not human.

Clear that there is something outside of the human realm that drives the "powers that be". There is "stuff" in the model space (of the web bot) that goes through the idea of "disappearances" beginning next year (relating to extraterrestrials). It's as if an inter-dimensional door opens up and people are sucked through the door and the door closes.

* 2009: Disappearance language gets more specific. Big changes.

* Some of the "powers that be" will disappear.

* A lot of alien activity way off in the future.

*

Indications in language involving ETs :: possible result of disinformation ::

o Alien wars are coming.

o These alien events may or may not be real but people are acting as if they are real.

* Things that Time Monks could not categorise/make sense of:

*

There is a [E.T. related] device out and about in the world being chased down by the "powers that be".

4

* Two whistle-blowers have a [ET linked?] device in their hands and are on the run.

- By just having the device they have created certain side effects that the "powers that be" couldn't have predicted. The Time Monks do not have a word for these devices. Relate it to a cave man trying to describe a modern gun.

* Presidential Election : Won't be decided for some months past November. Won't make any difference to what's happening.

* Religion : Religious component. Religion will change in December between 12th to the 15th. Evangelicals will have an "un-burdening", Evangelicals will feel some sort of "shame".

*

Big revolution coming against the "powers that be"

5

America will be beset by a variety of problems, which they broke down as 45-48% related to the economy, 40% concerning the military & the rest associated with natural disasters. Between 2 & 22 million lives could be lost or seriously impacted, they estimated, possibly related to a "global coastal event" in '09. On Dec. 10-12th, 2008, a large quake could hit the Pacific Northwest, they added.

Recommended developing self-sufficiency & the ability to live off-the-grid. They also spoke about strange disappearances next year, in which people, including those in power, will vanish without a trace into interdimensional doorways.

Just as intriguing was mention of an object they call a "coherer" :: a reverse-engineered or left-behind dimensional artifact is currently in the possession of people who are concerned for their lives.⁴

Notes:

1 In fact the reverse seems true in the shorter term as predicted by Lindsey Williams. Oil may head as low as \$50.

2 The build-up, plateau and release stages with regards to the linguistic patterns and phrases are the key to understanding how the web-bot predictions operate. From listening to other interviews and having seen one of the official web-bot or Asymmetric Language Trend Analysis reports it becomes easier to follow how the predictive process can be formulated and understood.

3 An interesting point made on the interview with Jeff Rense was that Cliff saw it as a possibility that those with sufficient resources could actually seed ideas and 'chatter' in appropriate places online so as to skew the outcome of ALTA type technologies and outcomes. Thus governments or above-government agencies with an agenda may come to see this as important in the future.

4 I have an idea what this object could be. It fits the described scenario pretty well - although there is minimal information from the web-bots report. I'll add a link detailing this in the next few days. *** Brief comments made about this in an OM Forum post/thread.

5 This could be linked to some of the strange comments being made regarding 'the testing of Obama'. Several comments have been made [or slipped out!] by officials which hint at something of this nature early in the new presidents period in office. In addition - it appears as if many of the old guard from previous US regimes are behind Obama as "advisors".

Additional Data - TimeWaveZero

[[Terence McKenna]] pioneered the study of novelty over historical time and created a fractal graph system based on this.

Understanding how the system works needs some background research but suffice to say that when plotting various magnifications of the current epoch we get a huge shift from habit into novelty [or degree of connectedness/change]. See screen sots from TWZ software:

Ten Year Epoch

[[Novelty theory]] attempts to calculate the ebb and flow of novelty in the universe as an inherent quality of time. It is an idea conceived of and discussed at length by [[Terence McKenna]] involves ontology, morphogenesis, and eschatology. Novelty, in this context, can be thought of as newness, density of complexification, and dynamic change as opposed to static habituation. According to McKenna, when "novelty" is graphed over time, a fractal waveform known as timewave zero or simply the timewave results.
